Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/751,607

Applicant(s)

WU ET AL.

Examiner

Joseph L. Williams

Art Unit

2879

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 September 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 21-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 21-38 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The amendment and response filed on 9/19/2007 has been entered and overcomes the rejections to the claims.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21-26 and 34-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Samsung SDI Co Ltd (JP 2003-068209), of record by Applicant.

Regarding claim 21, Samsung ('209) teaches in figure 9 and throughout the text an electrode for a plasma display panel, comprising: at least one bus line conductor (no number); and at least one pad (11) connected with the at least one bus line conductor, the at least one pad including opposing side sections that point away from one another wherein the sections extend laterally a same distance from the at least one bus line.

Regarding claim 22, Samsung ('209) teaches each of the side sections is triangular in shape.

Art Unit: 2879

Regarding claim 23, Samsung ('209) teaches each of the side sections has a triangular portion and a rectangular portion, the rectangular portion having a line width which is less than a line width of the at least one bus line conductor.

Regarding claim 24, Samsung ('209) teaches the side sections of the at least one pad each have a portion that gradually increases in width.

Regarding claim 25, Samsung ('209) teaches the side sections of the at least one pad gradually increase in width.

Regarding claim 26, Samsung ('209) teaches the at least one bus line conductor has a first width and the side sections have a maximum width that is greater than the first width, each of the side sections having a portion that is narrower than the maximum width and that intersects the at least one bus line conductor.

Regarding claim 34, Samsung ('209) teaches in Figure 8 an electrode for a plasma display panel, comprising: at least one bus line conductor; and at least one pad connected with the at least one bus line conductor, the at least one pad having an oval shape.

Regarding claim 35, Samsung ('209) teaches the at least one pad gradually increases in width.

Regarding claim 36, Samsung ('209) teaches the at least one bus line conductor has a first width and side sections of the at least one pad have a maximum width that is greater than the first width, each of the side sections having a portion that is narrower than the maximum width and that intersects the at least one bus line conductor.

Art Unit: 2879

Regarding claim 37, Samsung ('209) teaches an electrode for a plasma display panel, comprising: at least one bus line conductor; and at least one pad including tapering end sections and a bulging inner section, one of the tapering end sections connected with the at least one bus line conductor (see figure 8).

Regarding claim 38, Samsung ('209) teaches the at least one bus line conductor has a first width and the tapering end sections have a maximum width that is greater than the first width, each of the tapering end sections having a portion that is narrower than the maximum width and that intersects the at least one bus line conductor.

Claims 27-33 are rejected under 35 U.S.C. 102(b) as being anticipated by NEC Corp. (JP 06-044907), of record by Applicant.

Regarding claim 27 NEC ('907) teaches in figure 1 and the corresponding text, an electrode for a plasma display panel, comprising: at least one bus line conductor (no number); and at least one pad (5) connected with the at least one bus line conductor, the at least one pad including opposing side sections, each of the side sections having a blunted triangular shape, the side sections tapering away from an interior portion of the at least one pad.

Regarding claim 28 NEC ('907) teaches the interior portion of the at least one pad is rectangular in shape.

Regarding claim 29 NEC ('907) teaches the interior portion of the at least one pad includes blunted triangular shape end portions, one of the end portions connecting with the at least one bus line conductor.

Regarding claim 30, NEC ('907) teaches the at least one pad has an octagonal shape.

Regarding claim 31 NEC ('907) teaches the side sections of the at least one pad each have a portion that gradually increases in width.

Regarding claim 32 NEC ('907) teaches the side sections of the at least one pad gradually increase in width.

Regarding claim 33 NEC ('907) teaches the at least one bus line conductor has a first width and the side sections have a maximum width that is greater than the first width, each of the side sections having a portion that is narrower than the maximum width and that intersects the at least one bus line conductor.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph L. Williams whose telephone number is (571) 272-2465. The examiner can normally be reached on M-F (6:30 AM-3:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimeshkumar D. Patel can be reached on (571) 272-2457. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
